iCloud: iBooks Preferences

September 2020

File name

iBooks Preferences.json

File description

This file contains information related to the user's reading goals.

Why Apple keeps this information

Apple retains this information in order to allow the user to manage their reading goals and to sync Books information across the user's devices.

Field Name	Details
ReadingGoals.BooksFinished	This is a key of a dictionary, within that dictionary there are two values a "date" value and a "goal" value. This dictionary holds the data for the number of books a user wants to try and finish that year.
ReadingGoals.BooksFinished date	This is a timestamp of when a user set a goal for the number of books they want to read within this year
ReadingGoals.BooksFinished goal	This is an integer, representing the goal the user set for the number of books they are aiming to read this year.
ReadingGoals.StreakDay	This is a key of a dictionary, within that dictionary there are two values a "date" value and a "goal" value. This dictionary holds the data for reading goals streak data. This corresponds to the amount of time the user has set that they want to read, on a daily basis
ReadingGoals.StreakDay date	This is a timestamp of when a user set a goal for the number of minutes they want to try and read every day
ReadingGoals.StreakDay goal	This is an integer, representing the goal (in seconds) the user has set for the amount of time they want to aim to try and read on a daily basis
